

DECLARATION OF OWNERSHIP AND INTELLECTUAL PROPERTY RIGHTS

in the computer programme known as

VYUHA

Vyuha — Trade Journal (desktop application for Windows)

Application identifier: in.vyuha.tradejournal · Version covered: 4.4.0 and all prior versions

Declarant / Owner: **[FULL LEGAL NAME AS ON PAN]**

Date of declaration: **[DD Month 2026]**

Place: **[City, State]**

Prepared for submission to Cosmofeed Technologies Pvt. Ltd. (SuperProfile / Cosmofeed platform) as proof of the seller's ownership of the digital product listed for sale, and for the Declarant's own records.

PART A — DECLARATION

I, **[FULL LEGAL NAME]**, **[son/daughter]** of **[FATHER'S / MOTHER'S NAME]**, aged about **[AGE]** years, an Indian citizen residing at **[FULL RESIDENTIAL ADDRESS WITH PIN CODE]**, holding Permanent Account Number (PAN) **[ABCDE1234F]**, e-mail **thejesh463.git@gmail.com** and mobile **[+91 XXXXX XXXXX]**, do hereby solemnly affirm and declare as follows:

- Identity of the work.** I am the sole author, creator and first owner of the computer programme and associated works marketed under the name “Vyuha” (Devanagari mark “व्यूह”), also described as “Vyuha — Trade Journal” and “Vyuha — The Trade Journal That Tells You the Truth” (hereinafter “the Software”). The Software is a Windows desktop application for recording, analysing and reviewing a trader's own executed trades. Its full technical description is set out in Part B (Schedule of the Work).
- Nature of the work.** The Software is a “computer programme” within the meaning of Section 2(ffc) of the Copyright Act, 1957 and is protected as a “literary work” under Section 2(o) of that Act. Copyright in it subsists automatically from creation under Section 13 and does not depend on registration.
- First ownership.** I wrote the Software in my personal capacity and at my own expense. It was not created in the course of any employment, under any contract of service, on commission, or for any other person. I am therefore the first owner of the copyright under Section 17 of the Copyright Act, 1957. No employer, client, university, partner or other person has any claim to it.
- Period of creation.** Development of the Software began no later than 1 July 2026 and has continued without interruption to the date of this declaration. The version-control history described in Part C records 447 commits between 1 July 2026 and 22 September 2026, every one of which was authored and committed by me under the e-mail address stated above. Development is ongoing; this declaration covers version 4.4.0, every earlier version, and every later version that is a modification of the same work.
- No assignment, licence or encumbrance.** I have not assigned, sold, mortgaged, pledged or exclusively licensed the copyright, the source code, the name “Vyuha”, or any part of the Software to any person. No litigation, claim, notice or dispute concerning ownership of the Software is pending or, to my knowledge, threatened.
- Use of development tools, including AI assistants.** In writing the Software I used ordinary developer tooling including compilers, editors, package managers, and AI-based coding assistants (Anthropic's Claude models) operating under my direction and control. These tools were used in the same way as any other software tool; every design decision, every acceptance of generated text, and every commit was made by me. Under the terms governing those tools, output generated at my direction belongs to me. No other natural person contributed authorship to the Software. Version-control metadata that credits such tools as “Co-Author-By” is a tool attribution convention and does not denote a human co-author or co-owner.
- Third-party components.** The Software incorporates open-source libraries and, at the user's option, connects to third-party services. Every incorporated library is used under a permissive licence (MIT, Apache-2.0, ISC, BSD, MPL-2.0 or similar) that permits commercial redistribution, and the required attributions are shipped with every copy of the Software in a file named THIRD-PARTY-NOTICES.txt. No component licensed under the GNU GPL or AGPL is bundled with or

distributed as part of the Software. The full list is in Part D. My ownership claim extends to the Software as a whole and to all original code, design, text, graphics, branding and documentation in it, and does not extend to those third-party components, which remain the property of their respective owners.

8. **No infringement.** To the best of my knowledge and belief, the Software does not infringe the copyright, trade mark, patent, trade secret or other right of any person. It is not a copy, port, re-skin, private-label or “resale-rights” version of any other person's product. The Software has been offered to buyers only by me, through the channels listed in Part B.
9. **Regulatory position.** The Software is a record-keeping and analytics tool operating exclusively on data the user supplies about the user's own past and present holdings and trades. It does not give buy, sell or hold recommendations, does not provide investment advice, research reports or trading signals, and does not execute trades. I do not hold myself out as, and the Software is not marketed as, an investment adviser or research analyst under the regulations of the Securities and Exchange Board of India. **[OWNER TO CONFIRM THIS PARAGRAPH IS ACCURATE FOR THE VERSION LISTED — SEE FILLING NOTES]**
10. **Authority to sell and warranty to the platform.** I have full right, power and authority to list, sell and grant licences to use the Software through the SuperProfile / CosmoFeed platform. I confirm the representation required by the platform's Terms and Conditions that I am “the owner or the licence holder of all copyright in the Content”. I shall indemnify and hold the platform harmless against any third-party claim that the Software infringes that third party's intellectual property rights, to the extent provided in the platform's Terms.
11. **Truth of contents.** The statements above are true to my own knowledge and belief. I understand that a false statement in this declaration may attract the penalties for false evidence under the Bharatiya Nyaya Sanhita, 2023 and that the platform may rely on this declaration in deciding to list my product and to release payments to me.

VERIFICATION

Verified at **[City]** on this **[DD]** day of **[Month 2026]** that the contents of Paragraphs 1 to 11 above are true and correct to my knowledge and belief and that nothing material has been concealed.

Signature of the Declarant

Name: **[FULL LEGAL NAME]**

PAN: **[ABCDE1234F]**

Attestation (optional — required only if the platform asks for a notarised affidavit; see filling notes):

Solemnly affirmed and signed before me by the Declarant, who is identified to me by **[PAN / Aadhaar / Passport]** No. **[...]**.

Notary Public / Oath Commissioner — Seal, signature, registration number and date

PART B — SCHEDULE OF THE WORK

This Part identifies the Software precisely so that the declaration cannot be confused with any other product.

Item	Particulars
Product name	Vyuha (Devanagari mark “व्यूह”); window title “Vyuha — Trade Journal”
Tagline	“Every warrior had a charioteer. Yours keeps count.”
Application identifier	in.vyuha.tradejournal
Version covered	4.4.0 (current published release, git tag v4.4.0), all prior versions, and all later versions derived from the same work
Category	Desktop application — trade journal, portfolio record-keeping and trade analytics for Indian equity, F&O and MTF traders
Platform	Microsoft Windows x64 (macOS build exists but is not offered for sale)
Installer file	Vyuha_<version>_x64-setup.exe (NSIS), distributed with a detached signature; also as Vyuha_<version>_Client_Package.zip (about 34 MB)
Technology	TypeScript / Next.js / React front-end; SQLite data store (better-sqlite3, drizzle-orm); Tauri 2 (Rust) desktop shell running a bundled Node.js sidecar server
Installer metadata	Publisher: “Thejesh K”; Copyright: “Copyright © Vyuha”; WinGet manifest copyright: “Copyright (c) 2026 Thejesh K”
Licence to buyers	Proprietary end-user licence (TERMS.md dated 21 Sep 2026): one licence, one trader, key may not be shared or resold; governed by the laws of India
Licence-key mechanism	Offline Ed25519-signed key, format VYUHA-<payload>.<signature>; verified on the user's machine with no server call; keys issued only by the Declarant
Price list (INR)	Pro Monthly ₹999 first month then ₹1,499/month; Pro Annual ₹7,999/year; Journal Lifetime ₹29,999 once; 7-day full trial; core journal free
Refund policy	REFUND_POLICY.md dated 21 Sep 2026: final once the key is issued, save two stated exceptions
Sales / distribution channels	SuperProfile / CosmoFeed storefront; direct sale by WhatsApp (+91 73936 73714); binaries via GitHub Releases
Public landing page	https://thejesh-k463.github.io/VYUHA-LOG/
Related work by the same owner	“atlas · by VYUHA” (vyuha-atlas v0.1.0), a local-first personal financial planner, in a separate repository; not part of the product listed for sale

Note on the mark “Vyuha”: “Vyuha” is used by the Declarant as an unregistered trade name and product mark for the Software. No trade-mark application has been filed as at the date of this declaration. The Declarant claims common-law rights in the mark arising from use since July 2026 and does not claim any registered trade-mark right.

PART C — EVIDENCE OF AUTHORSHIP AND CHAIN OF CREATION

The following facts are recorded in the Software's version-control repositories and installer metadata and can be independently verified by the platform on request (read-only access to the private repository, or screenshots, can be provided).

C.1 Primary repository — the Software

Fact	Value
Repository (private)	https://github.com/Thejesh-k463/VYUHA-LOG (mirror: https://codeberg.org/Thejesh_ktr/vyuha-trade-journal)
GitHub account holder	Thejesh-k463 — the Declarant
First commit	25aa650, 1 July 2026, “Initial commit: Vyuha v1.10.0”, author Thejesh.k <thejesh463.git@gmail.com>
Latest commit at date of declaration	f66dce1, 22 September 2026, same author
Total commits	447 (July 52 · August 194 · September 201)
Distinct human authors	One. Every commit's author and committer is the Declarant's e-mail address thejesh463.git@gmail.com
Release tags	v3.7.0 through v4.4.0, all created by the Declarant
Continuous integration	GitHub Actions workflows ci.yml and release.yml in the same repository build, test and sign the installer
Update channel	Auto-updater pinned to https://github.com/Thejesh-k463/VYUHA-LOG/releases with a minisign public key embedded in the application; only the Declarant holds the signing key

C.2 Related repository — atlas

Fact	Value
Repository (private)	https://github.com/Thejesh-k463/VYUHA-ATLAS
Commits / authors	9 commits, 25 August 2026 to 10 September 2026, sole author the Declarant

C.3 Other corroborating material available on request

- Screenshot of the GitHub repository page showing owner, first commit date and commit count.
- Windows Explorer “Properties → Details” view of Vyuha_4.4.0_x64-setup.exe showing Publisher and Copyright fields.
- The licence-issuance ledger kept by the Declarant (buyer identities redacted) showing that all keys were issued by the Declarant.
- Draft and published versions of the landing page, terms of use and refund policy, all authored by the Declarant.
- Copyright Office (Government of India) acknowledgement or Registration Certificate, once obtained — see Part F.

PART D — THIRD-PARTY COMPONENTS AND DATA SOURCES

The Declarant claims no ownership over the items below. They are used under the licences stated, all of which permit inclusion in a commercially sold proprietary program, and the required attribution notices are shipped with the Software in THIRD-PARTY-NOTICES.txt.

D.1 Bundled software libraries (summary of 532 npm packages and 485 Rust crates)

Licence family	Count (npm)	Remarks
MIT	437	Permissive
Apache-2.0	39	Permissive; attribution shipped. Includes TradingView Lightweight Charts™ 5.2.0 (© 2023 TradingView, Inc.) and SheetJS xlsx 0.20.3 (vendored tarball)
ISC	31	Permissive; includes lucide-react icon set
BSD-2 / BSD-3 / 0BSD	13	Permissive
MPL-2.0	3	File-level copyleft only; the files are used unmodified
LGPL-3.0-or-later (dual with Apache-2.0)	1	Used under the Apache-2.0 alternative
CC-BY-4.0, CC0, Python-2.0, other permissive	≈8	Attribution shipped where required
GPL / AGPL / CC-BY-NC / proprietary	0	None bundled

D.2 Optional external services (not bundled; user-operated)

- **Broker APIs** (Zerodha Kite, Dhan, Angel One SmartAPI, Upstox): read-only imports using the user's own credentials; no broker SDK is redistributed.
- **OpenAlgo** (AGPL-3.0 server): an optional, separately installed program the user runs on the user's own machine. The Software ships only its own independently written HTTP client for it, together with an in-app disclosure. No OpenAlgo code is included in the Software; the AGPL therefore does not attach to the Software.
- **Public market reference data** (NSE and BSE equity and ETF instrument lists, AMFI NAV data, exchange MTF lists): publicly published reference lists used for symbol lookup and classification. No proprietary exchange data feed is redistributed. **[OWNER: confirm whether any NSE/BSE data is redistributed inside the installer and, if so, cite the exchange's terms — see filling notes]**

D.3 Assets

No third-party fonts are shipped (the interface uses system fonts). Icons are from lucide-react (ISC). All branding, installer artwork, product copy and documentation are original works of the Declarant.

PART E — IDENTITY DOCUMENTS ANNEXED

Self-attested copies of the following are annexed to this declaration. Tick those attached.

☐	Annexure 1	PAN card of the Declarant
☐	Annexure 2	Aadhaar card (masked, first 8 digits hidden) or passport of the Declarant, as address proof
☐	Annexure 3	Screenshot of GitHub repository https://github.com/Thejesh-k463/VYUHA-LOG showing owner and commit history
☐	Annexure 4	Screenshot of installer file properties (Publisher / Copyright fields) for Vyuha_4.4.0_x64-setup.exe
☐	Annexure 5	Copy of the end-user terms (TERMS.md) and refund policy (REFUND_POLICY.md) as shipped
☐	Annexure 6	Copyright Office e-filing acknowledgement / Diary Number for Form XIV (if filed)
☐	Annexure 7	Udyam (MSME) registration certificate (if obtained)

PART F — FILLING NOTES FOR THE OWNER (REMOVE THIS PART BEFORE SUBMITTING)

1. What the platform actually requires. Neither the SuperProfile nor the CosmoFeed Terms and Conditions define an “ownership document”. Clause 6(1) of the CosmoFeed Terms and clause 13 of the SuperProfile Terms make you warrant that you are “the owner or the licence holder of all copyright in the Content”; the Prohibited Products list bans “unlicensed proprietary content” and “reselling private label rights products”; and clause 6(1)(ii) bans activities reserved to SEBI-regulated entities. A request for an “ownership document” is therefore a manual-review check against those three clauses. Part A (signed) plus Annexures 1, 3 and 4 answers all three. If the reviewer asks for something notarised, use the attestation block at the end of Part A on ₹100 non-judicial stamp paper (stamp value varies by state; ₹20–₹100 is typical for an affidavit).

2. Fill every red bracketed field. Use the name exactly as printed on your PAN. Keep Part B and Part C factual — every number in them was read from the repository on 22 September 2026; if you regenerate the document later, update the latest-commit line and the commit count.

3. Paragraph 9 (regulatory position) needs your confirmation. It states that Vyuha gives no buy/sell recommendations or trading signals. The product includes a Live Desk module and Telegram alerts. If any alert can be read as a recommendation to buy or sell a specific security, either reword paragraph 9 or remove that feature from the version you sell on the platform. SEBI treats “educational” labels and disclaimers as no defence for unregistered advisory activity, and CosmoFeed's Terms bar SEBI-reserved activity outright. This is the single most likely reason a trading-related product gets held on that platform.

4. Part D.2, market data. Confirm whether the NSE/BSE instrument lists and the bundled ETF list are packaged inside the installer. If they are, the safest wording is that they are used as reference lists for symbol lookup and that no real-time or historical price data belonging to an exchange is redistributed. Delete the red bracket once confirmed.

5. Strengthen the claim before or soon after submission (recommended, in this order):

- **Make the repository state the owner.** Add a LICENSE file (“Copyright © 2026 Thejesh K. All rights reserved. Proprietary.”), add an author field to package.json and an authors field to Cargo.toml, and change the installer copyright string from “Copyright © Vyuha” to “Copyright © 2026 Thejesh K” so that all metadata names the same legal person. Today the installer names the trade name while WinGet names you — a reviewer will notice.
- **File Form XIV with the Copyright Office.** Online at copyright.gov.in, category “Computer Programme / Software”. Fee ₹500 for an individual applicant. Upload the first 25 and last 25 pages of source code as PDF (trade-secret portions may be redacted). The Diary Number arrives immediately and is itself useful evidence; the certificate takes roughly 2 to 6 months including the mandatory 30-day objection window. Registration is optional in law but is the strongest single document you can hand a platform.
- **Register on Udyam** (free, same day) if you want an MSME certificate naming you as proprietor of “Vyuha”; some platforms accept it as business proof.
- **Trade mark.** Optional. A Class 9 (software) and Class 42 (SaaS) application costs ₹4,500 per class for an individual/startup and gives you a filing receipt within a day. Only worth it if you expect copycats.

6. Repository hygiene before you show it to anyone. The licence-signing private key (license-private.pem) and the issued-key ledger with buyer e-mail addresses (license-ledger.jsonl) sit in the working tree of the repository. Move both out of the repository (and out of its history if they were ever committed) before granting any reviewer access or making the repository public. This is a security matter, not just a presentation one.

7. One inconsistency to be ready for. The TradingView Pine indicator script sold separately previously carried a Mozilla Public License 2.0 header and a “© TheWrap” line. It is not part of the product listed on the platform and the client-package tests keep it out, so it is not covered by this declaration. If you ever list it, resolve its origin first.
